DEFINITION OF LIQUIDATION VALUE

Liquidation Value is defined in *The Dictionary of Real Estate Appraisal*, Seventh Edition as:

The most probable price that a specified interest in property should bring under the following conditions:

1. Consummation of a sale within a short time period.
2. The property is subjected to market conditions prevailing as of the date of valuation.
3. Both the buyer and the seller are acting prudently and knowledgeably.
4. The seller is under extreme compulsion to sell.
5. The buyer is typically motivated.
6. Both parties are acting in what they consider to be their best interests.
7. A normal marketing effort is not possible due to the brief exposure time.
8. Payment will be made in cash in US dollars (or the local currency) or in terms of financial arrangements comparable thereto.
9. The price represents the normal consideration for the property sold, unaffected by special or creative financing or sales concessions granted by anyone associated with the sale.

This definition can be modified to provide for valuation with specified financing terms.

The following data and analysis is offered as an addendum to the appraisal report, and cannot be relied upon without the complete appraisal report, with specific attention to the discussion of market conditions and normal market exposure. As specified by the client, the liquidation value is based upon the following market exposure: Less Than 30 days 60 days 90 days Other _____

DEVELOPMENT OF LIQUIDATION VALUE

The appraiser has relied upon the following method(s) to develop an opinion of liquidation value:

- Market value as reported within this appraisal report correlates with liquidation value (see comments below).
- Market Analysis (See Comparable Grid on following page).
- Statistical Analysis (See comments below).
- Secondary Analysis – e.g. Interviews with market participants, peers, news media research, etc (See comments below).
- Alternative Analysis – (See comments below).
