SITE VALUATION

Site Valuation Methodology

Sales Comparison Approach: The process of deriving a value indication for the subject property by comparing sales of similar properties to the property being appraised, identifying appropriate units of comparison, and making adjustments to the sale prices (or unit prices, as appropriate) of the comparable properties based on relevant, market-derived elements of comparison. The sales comparison approach may be used to value improved properties, vacant land, or land being considered as though vacant when an adequate supply of comparable sales is available.

Market Extraction: 1. A method of estimating land value in which the depreciated cost of the improvements on an improved property is calculated and deducted from the total sale price to arrive at an estimated sale price for the land. 2. A method of deriving capitalization rates from property sales when sale price and net operating income are known.

Alternative Method: (Describe methodology and rationale)
